Summary

I am a skilled web developer with a strong focus on frontend technologies like JavaScript and TypeScript, specializing in React. Additionally, I have experience working with Node.js on the backend.

Skills

JavaScript, TypeScript, HTML, CSS, React, Redux, ReduxToolkit, Git, Node.js, Express.js, MongoDB, Firebase, REST API, API, Swagger, Postman, Docker

Experience/Project

- Online hardware store built using clean JavaScript.
 - Development of a web application for online ordering and delivery of meals. (React, Firebase)
 - Online platform for travelers with functionality to search, book and evaluate a variety of tourist places and services. (React, Firebase)
 - TypeScript project to find users and their repositories on GitHub. Includes: TypeScript, Redux Toolkit (RTK), RTK Query, Tailwind CSS."
 - Threads(clone) implementation of the server part on Node.js using Express.js framework, MongoDB database. The client part was developed in TypeScript using the following technologies: Redux Toolkit, RTK Query, React Hook Form, React, Next UI. Docker containers and Docker Compose communication are implemented for both parts of the project.
 - REST API development using pure Node.js without using Express.js framework based on SQLite database.
-

Certification

JavaScript Developer
